

The Haacking Club

{ sign-up here -> bit.ly/2Kxomzy }

The Haacking Club is an [Open Educational Resource](#) organization that mentors young learners (14-24) in gnu/linux system administration hacking and has a guiding philosophy based on the [Four Freedoms](#) and [Five Rs](#). By the term *haacking club*, we are identifying ethical gnu/linux hacking projects and excluding offensive and unethical cracking endeavors.

In the Haacking Club, you will learn about:

- GNU/Linux system administration
- Building webservers
- Designing websites
- Content Management Systems
- VPN Servers, File Servers
- OSI model / Networking Fundamentals
- *Create your own hacking project*

The Haacking Club also gives its students a chance to put their skills to the test and has competed in the Cyber Patriot Competition three times, and once in the National Cyber League. The Haacking Club took 1st place in the Middle School division in 2015, and 3rd place in the High School Gold Division in 2017.
